K-State Agricultural Economics Presents:

Risk Management on the Farm

Online, on-demand course to take when it is convenient for you.

Taught by Robin Reid, Extension Farm Economist, and LaVell Winsor, K-State Farm Analyst

Five Lessons: Determining Cost of Production, Crop Insurance, Crop Marketing, Farm Programs (ARC/PLC), and Beef Cow/Calf Risk Management

Course Description:
• Learn principles of determining cost of production, developing a marketing plan, evaluating crop insurance options, and participating in farm programs (ARC/PLC)
• Participants will work with a case farm to apply these topics to a real-world farming operation through hands-on activities.
• The goal of this class is to acquire risk management skills that can be applied directly to a farming operation.
• The bulk of the course focuses on risk management for row-crop farming operations but also includes principles for beef cow/calf operations.

Special Topics:
• Managing stress and being resilient in tough times
• Communicating effectively with family members

Registration Fees:
• $100 education only

Other information:
• Have 6 months from registration to complete
• This course is a replica of the 5-part Risk Management Series delivered by KSRE in 28 locations across the state from January-February 2022 in which 340 producers participated in-person
