## Tips

- Any chicken part may be used for this recipe. If using boneless, skinless chicken breasts, use only 3/4 pound.
- Soup freezes well. Make ahead and freeze for a cold or sick day.
- Other seasoning may be used instead of the parsley and Italian seasoning.
- If you like, remove chicken skin before cooking. This will decrease fat and calories slightly.

### ***Can Chicken Noodle Soup Really Help You Get Well?***

*Even though it sounds too good to be true, chicken noodle soup can actually help you get well faster when you are suffering from the head and chest congestion that comes with cold and flu season. The hot broth can clear congestion and ease a sore throat; it also provides the fluids that our bodies need more of when we are sick. The chicken provides protein, which our immune system needs to fight off the germs. And the vegetables and whole grain noodles provide vitamins and minerals that boost our immune systems.*

*So, keep this soup at the ready to help your family fight off colds and flu this winter. It freezes well, so put some in freezer containers just in case there is a time you are not feeling well enough to cook.*
